

I am sending this in hopes that you DO NOT change Indiana's telephone privacy law. I have had a unpublished telephone number for about 30 years now so I would not have to put up with people calling me and trying to sell me something. I received an average of about 10 phone calls per night before Indiana implemented the telephone privacy law. It has been heaven not to have to answer the phone to people harrassing me. I go to bed early and they use to call and wake me up. What are my RIGHTS? I haven't had this much peace in years. Thank you for reading my comments.
